Project title: Together We Can

Project number: 2019-1-UK1-KA205-060934

TPM IN LITHUANIA

Partners from 6 different countries on the 28 th of January met in Lithuania to discuss about youth addiction problems.

" TOGETHER WE CAN " is to introduce experimental prevention programs in different territories with the active involvement of young people using a methodology that combines the cognitive, affective and relational elements that promote the non-formal education method. The innovative character of the project arises both in relation to the contents and to the method.

The participants will be taught that the use of drugs is an "inadequate behavior, to be avoided as it puts at risk their own and the other's health, the psychic and social integrity as a whole" and transmit them a "disvalue and not a plus value ". So, the same problem is all over the world the same and there is no border for addiction problem. The drug user is the drug user in France or Lithuania or Turkey and etc.

WE VISITED THE CENTRE FOR ADDICTIVE DISEASES

We heard so many stories that ended badly but also we met young people there and they did not feel ashamed to tell their true life stories and discussed about addiction problems. All partners from different countries agreed that we should do something more to stop addiction problems. We need to do more job to get better situation!
